

OPD SCHEDULE

Sir H. N.

Reliance
Foundation Hospital

RESPECT FOR LIFE

Sir H. N.

Sir H. N. Reliance Foundation Hospital is a 360 bedded quaternary care Hospital located in South Mumbai with following thrust areas: Cardiac Sciences, Advanced Cardiac Surgery & Heart Transplant, Transplant Medicine (Liver, Lung, Kidney & Bone Marrow), Gastroenterology, Hepatology, Neurosciences, Oncosciences, Renal Sciences, Robotic & Minimal Invasive Surgery, Minimal Access and General Surgery, Obstetrics & Gynaecology, Paediatric Sciences and Rehabilitation & Sports Medicine.

The hospital's mission is to deliver safe, affordable and world-class healthcare to all sections of the society by using international evidence-based practices through highly-skilled professionals, well-trained staff and latest technology. The hospital is JCI (Joint International Commission) and NABH Accredited which is the highest standard for Quality Care & Patient Safety. Also, it is the Largest Gold-certified Green Hospital in Mumbai: National and International Green Building Conformance.

This is a technologically-advanced institution designed to international standards and the most stringent criteria in infrastructure, medical care, fire-safety norms, and environmental guidelines. This is because every element that comprises The Hospital's making, from the premises, to the processes, to its professionals, contributes to the overriding principle: Respect for Life.

HOSPITAL HIGHLIGHTS

1. State-of-the-art Planning, Design, Architecture and Infrastructure

This hospital conforms to AIA design standards, ASHARE for HVAC, NFPA for Medical Gases, the American Disability Act, AERB for Radiation & Nuclear Medicine, and the Drug Controller of India for the Blood Bank.

2. Cutting-edge Technology, Equipment, and Resources

The OT Complex is truly 'modular', built to manage infection, increase productivity, and adapt to future technology changes. Emergency Medical Services examines and treats patients all in one place. Imaging modalities reduce radiation doses. The CT scan is Asia's first, and the world's fifth. India's first Pneumatic Tube system transports medicines and materials, while separate, parallel lines carry Bio-Medical Wastes.

3. High-quality Care with No Differentiation in Service

Clinical care across the hospital is standardised, and transcends socio-economic status. We are Mumbai's first hospital to offer self-contained rooms (toilets, showers, rest areas for relatives) to indigent and subsidised patients.

4. Scalable, Multi-use In-patient and Isolation Rooms

The In-Patient rooms are designed with the capability to convert to a single-room step-down ICU. Dedicated Isolation Rooms have been planned across in-patient floors to accommodate patients with special requirements.

5. Fully-digitised, Instant Access to Patient Medical Records

The seamless integration of all our radiology equipment, HIS (Hospital Information Systems) and the PACS (Picture Archiving and Communication System) ensures real-time transfer of data and reports across hospital systems.

6. National and International Green Building Conformance

We harvest rainwater, re-use water for flushing after STP treatment, generate hot water from waste heat and use energy-saving devices. We are the first hospital to introduce mega AHUs. Sir H. N. Reliance Foundation Hospital is the largest LEED Gold rated Green Hospital in Mumbai.

W.E.F - 1st January, 2024

HERITAGE 1st FLOOR - OPD SCHEDULE*
